

SHORT UPDATE ON ICDP ACTIVITIES IN NORWAY IN 2019

In 2019: Heidi Westborg, with many years of experience in international development work, was appointed as a new chair of ICDP Norway.

The Norwegian Ministry allocated new funds for ICDP work with the immigrant population.

The ICDP research project that adapted ICDP for caregivers working in nursing homes with older people continued to develop in 2019, when a new group of facilitators received ICDP training.

A report of peer reviewed research concluded that, even though the public health nurses do not implement the ICDP in the form of structured group meetings over an eight-week period, they still apply the knowledge and way of thinking from the programme in their communication and guidance when observing children and parents.
