

ICDP IMPLEMENTATION IN THE PHILIPPINES

A Parenting Program for the Pantawid
Familyang Pilipino Program
Facilitator Guide

Pantawid Pamilyang Pilipino Program

The Philippines' conditional cash transfer initiative

Covers 4.4 million households, 20 million people (20 % of the population)

Purpose - to reduce intergenerational transfer of poverty by keeping children healthy and in school

4Ps is already a law. SCP was part of the crafting of its Implementing Rules and Regulations

New strategy since 2020- social case management of families by social workers to support families to come out of poverty

Why introduce a parenting program for 4Ps beneficiaries?

Child Sensitive Social Protection (CSSP)

a Save the Children (SC) global initiative to strengthen government social protection programs for increased impact on child development.

4Ps- some of the known impacts on children

- Improved school attendance
- Increased health check-ups
- Improved dietary diversity
- – but **progress is uneven and impact on child development remains a challenge** (World Bank, 2018, 2021) also within 4Ps households (ADB, 2020)

Parents are the cornerstone of child development!

- SC commissioned a **parenting study** in 2016 in areas surrounding Ormoc:
 - Parents see obedience, education, and provision of basic necessities as good parenting.
 - Limited understanding of the importance of spending quality time with children, to listen to and praise children, to engage with them, and how this will stimulate children's development.

Integrating a parenting program into the Pantawid Program

- SCP used the Family Development Sessions (FDS) as a platform to introduce a robust parenting program
- The parenting program is now part of the FDS 7-Year Transformative Learning Path (TLP)
- Within a 4-year period the regional government aims to cover 272 175 parents
- 700,000 parents for the 4Ps national for seven years period
